

Finding the right communication device

There is no such thing as “one size fits all” when it comes to communication devices for individuals with speech and language disorders. That’s why we offer three options:

AllTalk™

ANYWHERE, ANYTIME, ANY WAY: [The most versatile communication device available](#)

The AllTalk is lightweight, ultra-sleek, and can be positioned as a laptop, tablet, tent, or stand for convenient use in a variety of settings. This flexibility makes it easy to transport and use, so you can communicate confidently no matter where you go or what you do.

TouchTalk™

CONVENIENCE ON-THE-GO: [Portability in a full-featured communication device](#)

The TouchTalk is discreet and lightweight — just over one pound, including its protective carrying case — so you can use it while easily blending into a variety of social settings.

MiniTalk™

POCKET-SIZED TECHNOLOGY: [Maximum Portability, Minimum Size](#)

The MiniTalk is ultra-portable and extremely lightweight — less than one pound, including its protective carrying case — so you can easily communicate while on-the-go.

To see which Lingraphica device is right for you, try one today for free by calling 888-274-2742.

A Closer Comparison of Lingraphica Devices

All three Lingraphica communication devices use an icon-based language system that includes more than 4,400 adult-appropriate graphic icons and animations that represent 9,000-plus words — empowering you to find your voice by quickly building phrases to help reconnect with your family, friends, and community.
